

Paciolan: Custom Fields

Spring 2021 Presentation 1

Presented By: Yihan Wang, Sirui Hu, Yadi Yang

Overview

- **Background**

- **Paciolan** is a company aiming to serve the **business clients**, like the university sports and venues, and provide a better platform for them to serve their **patrons and donors (users)**.

- **Goal**

- To derive business insights in helping define user categories and user potential interests from the **5 client-defined major custom fields** that were assigned to each user.

- **Objectives**

- To find out similar characteristics among users who have been assigned common custom keywords/tags.
 - Features will be processed in a **data analysis pipeline**

Data Description

Response/Target Data

5 Custom Fields

- Keywords
- Tags
- User Defined Fields
- Donor Categories
- Motives

Features

Clients' & Users' Demographics

- Donor Membership
- Allocation of Donation
- User Email

Action Data

- Donation History
- Ticket Purchasing History
- All Transaction History

Cleaned Data Sets (Snowflake DB & S3)

* We use AWS S3 bucket to store and manage our cleaned data.

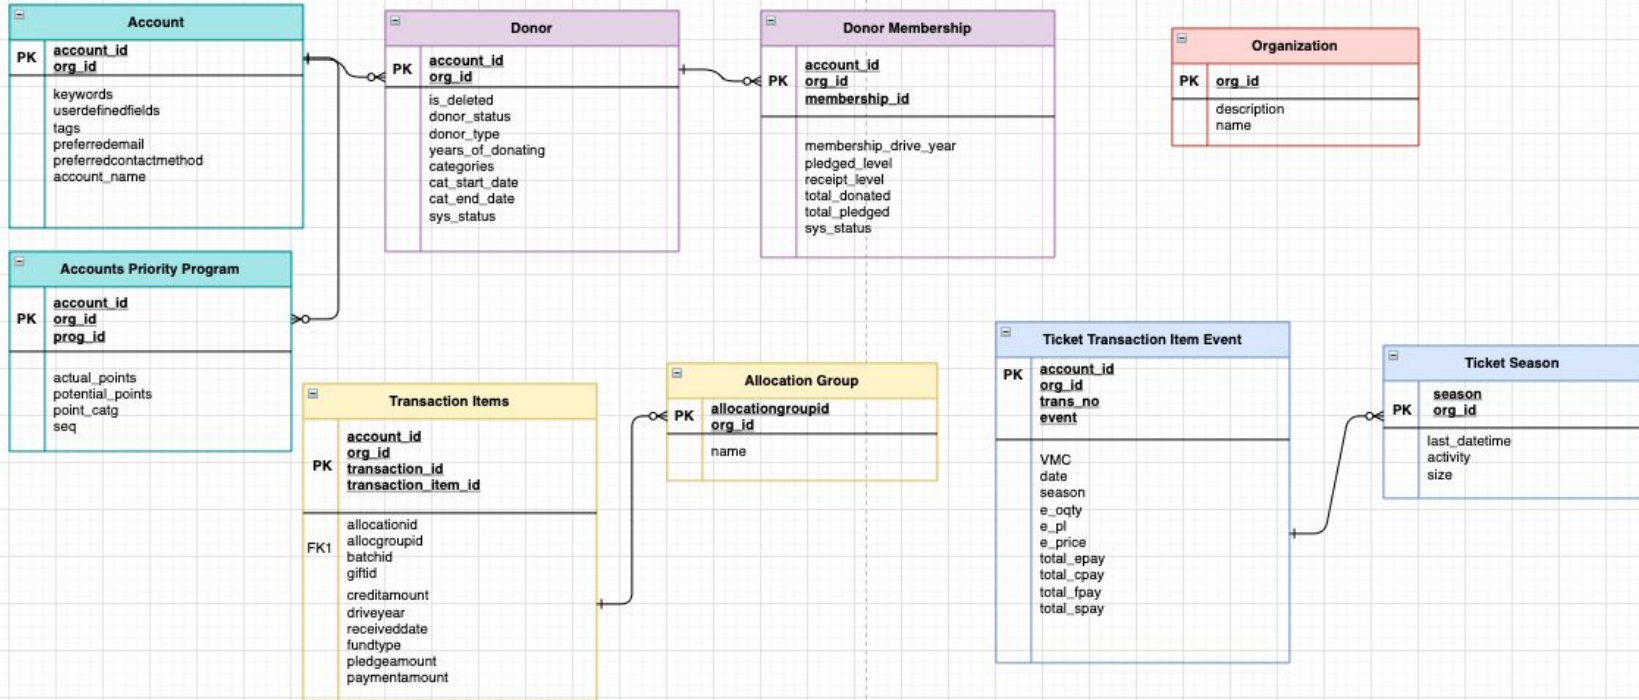

Major Datasets

- Account Data
- Donor Data
- Transaction Items Data
- Ticket Season Data
- Ticket Transaction Item Event Data

Other Usable Datasets

- Account Priority Points Program Details
- Donor Membership
- Allocations
- Allocation group
- Organizations
- Gifts

ER Diagram for Cleaned Dataset

PCA Analysis Summary

- Duration: 3 consecutive years (2018-2020)
- Features: values in each column were aggregated in:
 - sum, mean, median, min, max, var, size
- 4 PCA plots:
 - Total ticket payment features by year
 - Total pledged and received donation features by year
 - Total transaction amount aggregate values by year
 - Total payment features with all features in the above 3 tables, excluding the NULL values
- Method:
 - Step 1: Group by org_id, account_id and year:
 - total amount in each year for each organization
 - Step 2: Group by org_id and year:
 - aggregate values in each year for each organization

Data Visualization - PCA

Data Visualization - PCA Cont.

Milestones

- ☒ Set up accounts
- ☒ Explore the raw data
- ☒ Draft the proposal presentation.
- Research relevant literature and methods to come up with some initial ideas.

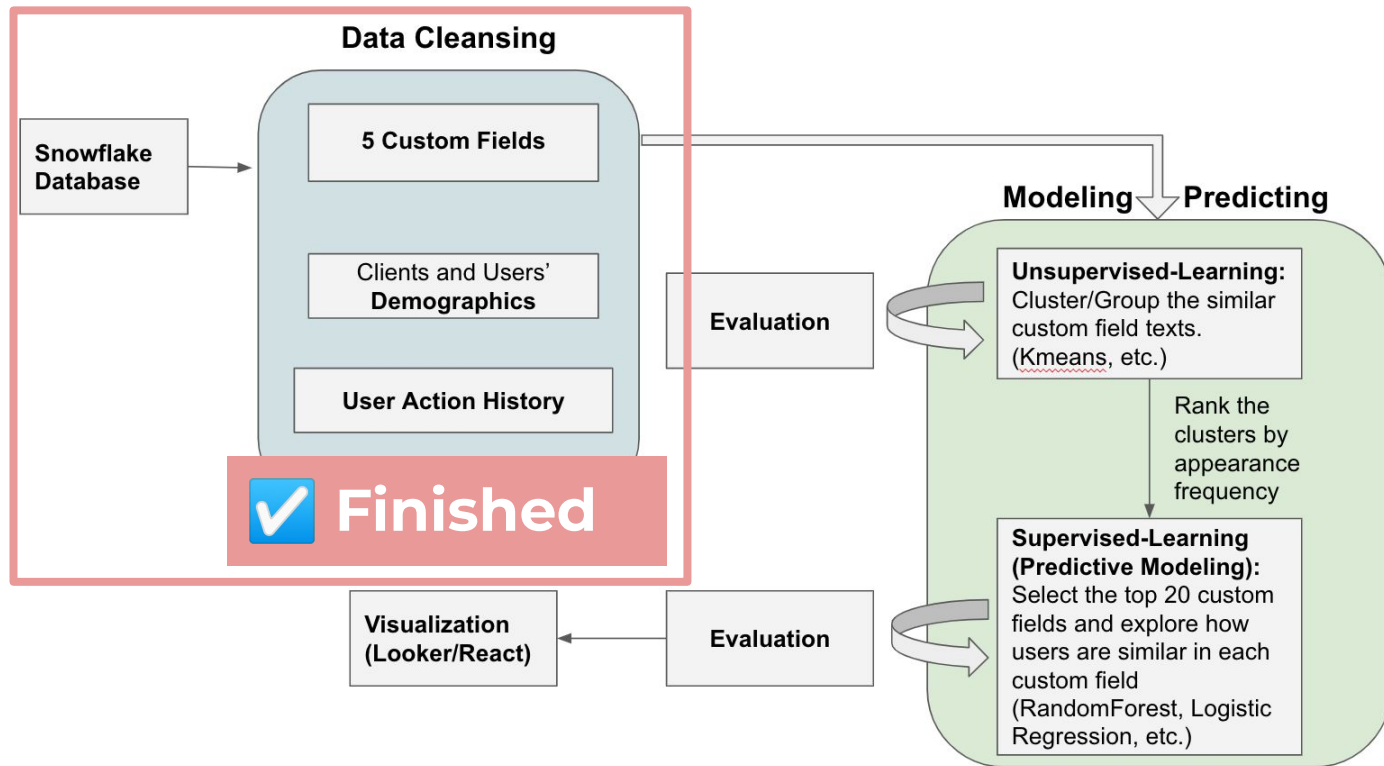

- Evaluate the results of experiments.
- Use Looker/React to build data visualization for the deliverable results
- Automate the process of assigning tags and gain insights from the results
- Start writing the final report

- ☒ Set up a weekly agenda and recurrent zoom meetings with the Paciolan team.
- ☒ Preprocess the raw data and start cleaning and organizing the data for future use.
- ☒ Discuss with the sponsor and know their preference
- Continue brainstorming and experimenting on any possible approaches.

- Optimize results and prepare for the final presentation
- Finalize the final report

Data Analysis Pipeline
